

RULES IN MEXICO

1. The house has water stored in a pila. There will be plenty of water there for you to bathe with, but we will show you how to notice if it is getting low. If it is, notify site manager who will have it filled. A water pump is quite costly to fix and it will burn out if the water runs low.
2. **DO NOT** drink the water or cook with it. Bring bottled water or buy it in town.
3. If there is a shower provided outside at each house, wash the sand off there. Do not use the bathtub for this purpose. We run on septic tanks and the sand can clog the drains.
4. Put toilet paper in the garbage pail in the bathroom. Do not put it in the bowl unless necessary. Do not flush after each event to conserve water
5. When you leave, throw away all opened boxes. Do not put them back in the cabinets. Also throw away the sugar used, do not leave it. This attracts ants.
6. Do not pour grease down the drain. Pour it in something (i.e. empty peanut can or other can) before throwing it in the trash.
